

## Product Information

PocketCinema V10

# PocketCinema V10

### • Market Overview

Traditional projectors are for presentation in meeting or training occasions. They are big in terms of size and weight. Home users using projector as a part of home theater is continually growing.

The target market of PocketCinema V10 is personal entertainment and business travelers. The design emphasizes pocket-size and light weight—less than 180g. Not only is a projector but also a standalone media player. With mobile phone-like size and rechargeable battery, V10 can be used any time and anywhere under proper projection distance and lighting environment for fun, entertainment, and business applications.

### • Product features

- A mobile media player mini-projector playing back picture, MP3, and video clips
